INDOOR ENVIRONMENTAL QUALITY		PRODUCT CONTRIBUTIONS	
EQ	<p>Low-Emitting Materials</p> <p>Option 1: Product category calculation (1-3 points)</p> <p>Number of points is dependent on the LEED® rating system and the number of compliant categories.</p> <p>For the Interior Adhesives and Sealants Applied on Site category, at least 90% of adhesives and sealants, by volume, must satisfy the General Emissions Evaluation. Also, 100% of adhesives and sealants wet-applied on site must satisfy the VOC content requirements for wet applied products.</p>	Contribute	<p>INGREDIENTS AND EMISSIONS</p> <p>The products were tested and determined compliant in accordance with California Department of Public Health (CDPH) Standard Method (CDPH) v1.2-2017 for Private Office, School Classroom and Single Family Residence scenarios, except for Pro Plan™ and Pro Flowlevel™ 40 fiber reinforced.</p> <p>AND</p> <p>The products conform to SCAQMD Rule 1168, July 1, 2005 or the Canadian VOC Concentration Limits for Architectural Coatings.</p>

It is important to consider that the total amount of possible points reflects the number of achievable points in each credit category. The product itself cannot achieve this score, as defined above, but is considered as a beneficial element in order to achieve LEED® credits.
