Yes ○ No

created via: HPDC Online Builder

HPD UNIQUE IDENTIFIER: 32206

CLASSIFICATION: 09 32 00 Mortar-Bed Tiling

PRODUCT DESCRIPTION: PRO COMPLETE™ SET is an ECOLOGICAL, 100% silica sand-free, universal, sag-slump resistant, lightweight, highly polymer-modified, and ultra-creamy thin-set mortar for institutional, commercial, and residential installations of non-vitreous, semi-vitreous, vitreous, and impervious tiles, including porcelain, most natural stone and large-format and heavy tile and stone. PRO COMPLETE™ SET contains lightweight recycled glass aggregates in place of silica sand to provide a safer, ecological, and more sustainable solution to traditional thin-set mortars, while offering exceptional versatility and performance, outstanding sag-slump resistance, and super-creamy and easy application characteristics. PRO COMPLETE™ SET is ideally suited for use with leveling clips and lippage control systems and can be used with uncoupling membranes. PRO COMPLETE™ SET contains PROMA's SUPER SETTING TECHNOLOGY, which offers extended open time, ultra-creamy consistency, and exceptional mortar transfer. Also, a 45 lb (20.4 kg) bag of PRO COMPLETE™ SET offers the SAME VOLUME/COVERAGE as a 50 lb (22.7 kg) bag of conventional mortar, allowing for easier carrying and transport.

INVENTORY AND SCREENING NOTES:

HPD prepared using a Nested Materials Inventory with a product threshold at 1,000 ppm. Substances present in the product, as well as known residuals and impurities, have been disclosed at 1,000 ppm. More details about how residuals and impurities are available in the appropriate sections. Substances are not all identified becasue some are prorpietary.

VOLATILE ORGANIC COMPOUND (VOC) CONTENT

VOC Content data is not applicable for this product category.

CERTIFICATIONS AND COMPLIANCE See Section 3 for additional

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- · Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
